PROFESSIONAL SUMMARY

Results-driven Computer Science Diploma student (2023–2026) with hands-on expertise in **Python development**, **Django REST Framework (DRF)**, and **RESTful API design**. Proficient in **backend development** including CRUD operations, Django ORM, **authentication**, and role-based access control. Experienced in **data analytics** — data cleaning, Exploratory Data Analysis (EDA), **Power BI** dashboard development, DAX, and **SQL**. Seeking internship or entry-level roles as a **Python Developer**, **Backend Developer**, **Django Developer**, or **Data Analytics Intern** to deliver scalable, production-ready solutions.

TECHNICAL SKILLS

Languages	: Python, Java (Basic), SQL
Frameworks	: Django, Django REST Framework (DRF)
Backend & APIs	: RESTful API Development, CRUD Operations, API Integration, Authentication, Role-Based Access Control
Core Concepts	: Object-Oriented Programming (OOP), Database Design, Backend Development, Problem Solving
Databases	: MySQL, SQLite, Django ORM
Data Analytics	: Data Cleaning, EDA, Power BI, DAX, Power Query, MS Excel, NumPy, Matplotlib
Tools & Platforms	: Git, GitHub, Postman, VS Code, MySQL Workbench
Web Technologies	: HTML, CSS, Django Templates

INTERNSHIP EXPERIENCE

Python Development Intern — Saiket Systems

Apr 2026 – May 2026 | Remote | ID: SKS/A2/C114168

- Developed and deployed Python-based backend assignments, producing clean, modular, and production-aligned code following real-world software engineering standards.
- Engineered and documented RESTful API solutions using Django REST Framework, implementing CRUD operations and authentication mechanisms for end-to-end backend systems.
- Applied Object-Oriented Programming (OOP) principles across all assignments to enforce code modularity, reusability, and maintainability.
- Integrated Git and GitHub for version control, maintaining structured commit history and collaborative development workflows throughout the internship.
- Recognised for exceptional problem-solving skills, sincerity, and rapid acquisition of Python development and API integration competencies.

PROJECTS

FinanceTrackerBackend

Python · Django REST Framework · SQLite · Postman

- Engineered a scalable RESTful backend system using Django REST Framework and SQLite, implementing CRUD APIs for income and expense tracking with real-time balance summary endpoints.
- Designed relational database models with role-based access control and authentication, enforcing data integrity and secure API access.
- Integrated dynamic filtering, input validation, and Postman-based API testing to guarantee endpoint reliability and accurate financial reporting.

MiniBankingSystem

Python · MySQL · OOP · Backend Development

- Built a full-featured backend banking application using Python OOP and MySQL, supporting account creation, deposits, withdrawals, balance inquiries, and transaction history.
- Implemented CRUD operations with Python's Decimal module for precise financial calculations, eliminating floating-point errors in all monetary transactions.
- Enforced database integrity through foreign key constraints and schema normalisation, ensuring consistent and reliable SQL data storage.

StudentManagementSystem

Python · Django · HTML · CSS · SQLite · Django ORM

- Developed a full-stack web application using Django MVC architecture with complete CRUD operations via Django ORM for end-to-end student record management.
- Designed a responsive UI using HTML, CSS, and Django Templates, integrating the Django Admin Panel for streamlined administrative control.
- Structured application logic following separation-of-concerns principles to ensure scalability, maintainability, and clean backend development practices.

SalesPerformanceDashboard

Power BI · DAX · Power Query · Data Analytics

- Designed an interactive sales analytics dashboard tracking KPIs — revenue trends, category-wise performance, and target-vs-actual comparisons using bar charts, trend lines, and KPI cards.
- Applied end-to-end data cleaning and transformation using Power Query and DAX formulas, ensuring data accuracy and consistency across all reporting layers.
- Enhanced analytical depth with dynamic slicers, drill-down capabilities, and multi-dimensional filters for comprehensive business performance analysis.

EDUCATION

Diploma in Computer Science — KIT Varanasi	2023–2026 (Pursuing) 70%
Class 12 — UP Board	2022 67.9%
Class 10 — UP Board	2020 77.16%

CERTIFICATIONS & TRAINING

- Data Analytics Job Simulation — Deloitte (via Forage) | Mar 2026 | Data Analysis, Forensic Technology
- Python Development Internship — Saiket Systems | Apr–May 2026 | Python Development, Backend Development
- ASP.NET MVC Summer Training — SMPS Innovation Infotech Pvt. Ltd., Lucknow
- Employability Enhancement Programme — Centum Foundation (Infosys Foundation), Varanasi | Jun–Jul 2025 | Grade: A+
